

Used Broderson Conversion to Battery or Hybrid Electric Power

2015

The conversion consists of removal of the following components:

- Engine
- Transmission
- Hydraulic Valves
- Hydraulic Pumps
- Electrical System
- Dash board with Controls

The machine is high pressure blasted and excess oil and grease is removed.

The following **NEW** components are installed:

- Hydraulic Pumps
- Hydraulic Motors
- Two Speed Transmission (Motor/Gearbox)
- Electric Motors
- High Capacity Battery System
- Computer Display
- Electrical System

Repair or replacement of existing slider pads, cylinders and other components is available.
